

In the Specification:

Please amend the abstract of disclosure as follows:

~~One embodiment, which might be termed a retrofit kit,~~
involves An apparatus for controlling pipeline televising
equipment ~~comprising~~ including a power control unit having at
least one input plug. The apparatus includes a communication
module having a receiving antenna and an output plug
substantially identical to the input plug. The apparatus also
includes a wireless handheld master control module having a
transmitting antenna. The control module includes at least two
actuators, ~~one each~~ for panning and ~~for~~ tilting a ~~pipeline~~
~~television~~ camera. ~~Another~~ A second embodiment ~~comprises~~
includes a substantially complete pipeline televising system.
Such system includes a power control module having (a) a power
control unit, (b) a digital display unit, (c) a video cassette
recorder, and (d) a television monitor. The system also has a
~~pipeline televising~~ camera cable-tethered to the power control
unit through a power line modem. In the improvement, the power
control module includes a communication section having a
receiving antenna and the system also has a wireless handheld
master control module having a transmitting antenna. ~~The~~
~~wireless master control module affords an operator a high degree~~
~~of mobility and often permits pipeline televising to be performed~~
~~by one person.~~
